# About Seminar

Homeopathy is not merely a system of medicine—it is a way of understanding life, disease, and healing. Yet, for many students and practitioners, the path from learning to successful practice often feels complex, overwhelming, or uncertain.

**“Homeopathy Made Easy”** is a unique two-day immersive seminar designed to bridge this gap.

In this inspiring seminar, **Dr. Rajan Sankaran** will take the audience on a journey through **40 years of clinical experience, research, and teaching**, unfolding the evolution of his understanding through real, inspiring clinical cases. Step by step, he will demonstrate how homeopathy can be practiced with clarity, confidence, and depth, making even complex cases understandable and approachable.

## This seminar is especially curated for:

- Undergraduate and Postgraduate students
- Faculty members
- Practicing homeopaths at all stages of their journey

## What to Expect

- Teaching via cases with long term follow-ups ‘
- Clear understanding of disease, remedy selection, and case analysis
- Insight into how deep observation and simple thinking lead to consistent results
- Wide range of cases following the basic classical approach to the ideas of sensation, kingdom, and superclasses in homeopathy
- Inspiration to rediscover confidence, curiosity, and joy in practice

## A vision for long-term growth and success in homeopathy

More than a technical seminar, “Homeopathy Made Easy” is an invitation—to develop deeper confidence in the vast scope of Homeopathy, to see a clear path ahead, and to remain lifelong learners in a constantly evolving science.

Note: The past seminar participants should know, that while Dr Sankaran will teach new cases, some cases would be a repetition from the earlier times but taught with the latest understanding.

# About Speaker

**Dr. Rajan Sankaran, MD (Hom)** is an internationally renowned thinker, teacher, clinician, and author in the field of homoeopathy. Widely regarded as one of the most original and influential minds in modern homoeopathy, he is known for his clarity of thought and path-breaking contributions that have transformed clinical practice worldwide.

His pioneering understanding of disease as a **state of delusion**, followed by the **discovery of newer miasms**, the classification of diseased states into **kingdoms** (plant, mineral, and animal), and the concept of the **seven levels of experience**, brought unprecedented clarity to case understanding.

These insights paved the way for one of his most revolutionary contributions—the identification of the **vital sensation**, the central thread running through a patient's experience at all levels. This approach, now **globally known as the Sensation Method**, marked a major shift in case-taking and remedy selection.

Continuing his lifelong quest to simplify and deepen homoeopathic practice, Dr. Sankaran's later research introduced the concepts of **subclasses, superclasses** and **WISE** (Witnessing the Inner Song Experience) — tools that allow a deeper, more precise understanding of patients and also serve as powerful therapeutic processes.

Dr. Sankaran's extensive research has been published in numerous books, translated into several languages, and is studied by homeopaths across the world. With a clinical and teaching career spanning over four decades, he currently heads **The Other Song – International Academy of Advanced Homoeopathy**, Mumbai, an institution dedicated to advanced clinical training, integrated with its global online platform **HOPE (Homeopathy Online Portal for Education)**.

# Schedule

**6th & 7th March '26**

**9:00 AM TO 11:00 AM** | **1<sup>st</sup> Scientific session**
